AgriNext or Agricultural and rural excellence Incubator and Platform.

AgriNext or Agricultural and rural excellence Incubator and Platform for the Exchange of competencies is an Erasmus+ project that aims to create a learning environment that responds to the skill demand on the job market in the field of agriculture.

Within the AgriNext project, partners will develop a new Guidance Service Model which will gather all the training and learning opportunities (formal, non-formal, projects, apprenticeships, etc. on the EQF levels from 3-6, designed for C-VET or I-VET learners) in the field of Multifunctional agriculture.

Page 2

Objectives

Objectives of AgriNext are the following:

- Development of Guidance service model (GSM) that continuously responds to the rapidly changing needs on the job market;
- Integration of systematic changes on national levels for flexibilisation and responsiveness of the school system;
- Empowerment of teachers for a fast response to the job market demand;
- Establishment of a collaboration system for continuous exchange between employers, teachers, trainers (skills ecosystem);
- Creating a physical and virtual environment for interaction, demonstration, development, and individualisation;
- Promoting rural development and vitality, presenting opportunities of multifunctional agriculture;
- Increasing digital competences amongst students and teachers.

Page 3

Within the project a common space will join students, learners, teacher, trainers, mentors, employers, guidance and service providers.

It will be established to support rural excellence, which will be guaranteed through the establishment of Business incubators for Rural Excellence.

AgriNext or Agricultural and rural excellence Incubator and Platform for the Exchange of competencies is an Erasmus+ project that aims to create a learning environment that responds to the skill demand on the job market in the field of agriculture.

The Agrinext Business incubator

Business incubators for Rural Excellence will be established and will provide a common space to allow students, teachers, trainers, employers, research institutions, NGOs and other participants to exchange their MA skills and competences closely related to green skills, for example precision and smart farming methods.

The Agrinext Platform

The AgriNext Platform will offer an online location where previously developed results will be collected and presented , improving communication, resources, and data sharing between VET training providers, companies, students, learners, guidance service providers and other stakeholders.
